GENERAL TERMS AND CONDITIONS OF THE TENDER FOR PRESERVATION, MAINTENANCE & SECURITY (PMS) SERVICES OF THE FOODGRAINS

1. Offers are invited from the parties under two bid system i.e. Technical Bid and Financial Bid for preservation, maintenance and security of foodgrain stock of FCI/ OSCSC Ltd. stored in OSWC godowns at Junagarh (13500 MT), Bhawanipatna-I (3000 MT), Bhawanipatna-II (5000 MT), Kantabanji (11700 MT), Malmunda (5000 MT) & Jeypore (6000 MT) for one year and extendable on mutual consent of the OSWC and successful tenderer in case situation arises on continuation of PMS services.
2. The tender documents shall accompany a D.D for Rs.5900/- inclusive of GST drawn in favour of the Odisha State Warehousing Corporation payable at Bhubaneswar towards the cost of tender documents.
3. Tender must be accompanied with an **EMD @ Rs.2,00,000/-** for each location in the shape of Demand Draft issued by any scheduled bank in favour of Odisha State Warehousing Corporation, payable at Bhubaneswar.
4. The tenderer may submit offer for individual godown or all the godowns for which EMD of required amount is to be accompanied with the tender document.
5. **The tenderer must have 02 years experience during last 05 years i.e. 2017-18 to 2021-22 in providing preservation & maintenance services of minimum 02 lakh MT of foodgrains/agricultural produce in a year with SWC/ CWC/ FCI/ Govt. agencies/ Private agencies.** The tenderer is required to furnish the experience certificate in the proforma at **Annexure-2** alongwith documentary proof having such experience in the technical bid. Audited profit & loss statement for the relevant experience period shall be furnished in the tender.
6. Minimum net worth of the tenderer must be **Rs.10 crore** excluding residential house / residential property.
7. The party will have to quote the rate for PMS services for all locations or individual location for which tender is to be submitted. The parties will quote their rates per Quintal per Month taking into account the rate of storage charges paid by FCI to OSWC **i.e. Rs.4.96 per 50 kg. bag per month i.e Rs.99.20 per MT per month.**
8. In case the rate quoted for PMS services by the tenderer will be the same, preference will be given to the tenderer in handling of more quantity of foodgrains for PMS services.
9. The tenderer may inspect the warehouses prior to quoting of rates to ascertain the type of operation to be carried out for preservation, maintenance and security of stock stored in the warehouses.
10. PMS charges will be paid to the service provider after receipt of monthly storage charges from the depositors. The monthly PMS charges will be paid on the basis of space reserved by the depositor for storage of foodgrain in the warehouses during the month.

In exigency, PMS charges can be released considering the gap of maximum 03 months between the PMS bill month and the month upto which the depositors have released the storage charges.

11. It shall be the responsibility of the Service Provider to ensure the data entry on daily basis for which necessary personnel with adequate knowledge of working on computers shall be provided by the Service Provider.
12. In the event of failure of the Service Provider to undertake the work after execution of PMS agreement or resiling from the contract during its currency, OSWC shall have the right to get the work done and the Service Provider shall be liable to make good the loss, if any, suffered by the OSWC on this account and the OSWC shall also have the right to deduct/recover the amount of such loss and to claim the balance amount from the Service Provider without prejudice to any other remedy under the Contract/Law.
13. The Service Provider should ensure to keep all the time adequate number of employees/ labour to cope up with the work for the purpose of preservation, maintenance and security of stocks.
14. The volume of foodgrains in storage is likely to fluctuate (increase or decrease) and the PMS charges will be paid based on the space utilized by FCI/OSWSC during a month.
15. The Service Provider shall have to perform all the services provided for in this tender.
16. The Service Provider shall be responsible for preservation of stocks in accordance with the instruction issued by the OSWC.
17. Foolproof security arrangements shall be made by the Service Provider in respect of the stocks entrusted to it. In case of any defalcation/shortage of stocks, the Service Provider and the Warehouse Incharge, OSWC shall be jointly responsible to compensate the loss to the extent of cost of the stock.
18. Service Provider shall deploy its personnel to verify the correctness of the Receipt/dispatch of stocks and the authorized representative of Service Provider will duly verify the entries of receipt and dispatch and correctness of weight of stocks by putting his signatures along with the employee of the OSWC on the weight check memo, Register/Weighment sheets and the daily Transaction register; in addition to deploying workers for preservation & maintenance of stocks and watch & ward thereof.
19. The Service Provider shall provide all infrastructure required i.e. Dunnage, polythene sheet, High Efficiency Flooring, MLCL Covers for fumigation, Insecticides, fumigation and spraying equipments required for application of insecticides and other chemicals, locks, weighing scales and all other equipments as may be required for proper upkeep of health of stocks etc., in accordance with the norms of scientific storage.

ODISHA STATE WAREHOUSING CORPORATION

SALIENT FEATURES OF QUALITY CONTROL MANUAL AS IN FORCE AND AS BE AMENDED FROM TIME TO TIME WHICH SHALL BE PART & PARCEL OF TERMS & CONDITIONS OF PMS CONTRACT.

1. PRE- STORAGE STEPS:

A well-planned work is necessary in order to avoid haphazard handling of stocks and ensure proper accounting and preservation of custom. Therefore, before fresh stocks are received in the godowns, QC staff of the PMS service provider should be fully prepared to receive it. In this connection, the service provider should attend to the following points.

- i. Check up the godowns to ensure that there is no leakage and drainage is in perfect condition.
- ii. Cleanliness and disinfestations of godowns.
- iii. Estimation of capacity.
- iv. Drawing up of stack plan
- v. Dunnage
- vi. Chemicals for technical treatment of stock

2. CHECK UP OF GODOWNS:

In order to avoid the possibility of damage to the custom to be stored, the QC Staff of the service provider should check up that there will be no leakage from roof or walls during monsoon and that godown floor does not suffer from seepage. Any such requirement for repair and maintenance noticed by the service provider during the currency of the contract will be informed to the Corporation for timely repair and maintenance of the same. Repair and maintenance being infrastructure related, the Corporation has to ensure that the godown should be in perfect repair all the times. All cracks and crevices should be filled in and cement plastered. Other possible points of leakages in walls and roof should be checked up and got closed so that water in Monsoon does not enter the godowns through these leakages and damage the custom. If there are any rat borrows, Al Phosphide should be introduced and holes plugged with clay. After 24 hours the clay should be removed, openings plugged with cement mixed with pieces of broken glass. However, the service provider shall try on best effort basis to protect foodgrain stock stored but any damage to stock due to delay in repairs or non- repairs would be responsibility of the OSWC.

3. CLEANLINESS AND DISINFESTATION OF GODOWNS:

The godown should be got thoroughly swept and cleaned. If there is any suspicion of infection, it should be disinfested with Malathion or Deltamethrin spray.

4. DRAWING UP OF STACK PLAN:

The stack plan should be chalked out by bearing in mind the following three points:

- i. Maximum space is put to use for storage of stock.

- ii. Proper alleyways are left for carrying out handling operation, inspection of stocks and their disinfestations treatment with ease and efficiency.
- iii. Maximum benefit of aeration and ventilation arrangements available in the godowns in drawn, as far as possible, the base area of all the stacks should be uniform as far as possible.

5. STACK LINES:

The floor area may be divided into uniformly sized and serially numbered rectangular stack bases to build stacks. The stacks lines 2” broad drawn in white or black paint serves to mark the boundary of the proposed stack. While marking these stack bases care should be taken to leave 2ft. to 2.5 ft. wide alleyways and between stack and walls or pillars, for ventilation and operational purposes. The main alleyways for the haulage purpose may be 3ft.

6. STACK SIZE:

Actual size of the stacks in godowns should not exceed the size of 30 ft.x20 ft.

7. DUNNAGE:

Use of proper dunnage of polythene sheet or High Efficiency Flooring under the stacks is of fundamental importance to protect the stacks from moisture damage and there can be no deviation from this rule.

9. STACK CARDS:

Prescribed stack cards in Transparent natural color polythene of proper size should be kept ready for displaying on each stack.

10. COLLECTION OF SWEEPING:

During and after storage the loose grain/sweep will be collected cleaned, filled in standard bags and got accounted for as per procedure in vogue.

11. STACKWISE REGISTER:

After completion of storage prescribed stack wise register will be maintained for inspection and disinfestations treatment.

12. CARE OF GRAIN DURING STORAGE:

A. CLEANLINESS:

The godown should be swept regularly at least twice in a week and kept in neat tidy and hygienic condition. All webs on the wall roof, alleyway & bags should be removed regularly and bags should be properly brushed and cleaned. No loose grains should lie on naked floor.

B. PROVISION OF SAMPLE BAGS:

Adequate number of sample bags should be provided in each godown. All the samples drawn from the stacks for the purpose of inspection should also be kept in these sample bags after thorough cleaning.

C. AERATION:

Doors, Windows and ventilators of the godowns should be kept open on clear/dry / sunny days for aeration.

D. SPRAYING:

As soon as the stack is complete, it should be sprayed as per following norms:

Name of Insecticides	Nature of insecticides	Dosages	Remarks
Malathion 50 % EC in the emulsion of 1:100	Contact poison	Walls/alleyways bags surface 3 litres of prepared solution per 100 Sq. meter to control insects and avoid cross infestation.	Every fortnight
Deltamethrin 2.5% WP (120 gram in 3 ltrs. of water)	Contact poison	On foodgrain bags 3 litres of prepared solution per 100 Sq. meters	Once in three months

E. DETERMINATION OF SURFACE:

The surface area of a stack should be calculated for its five sides by applying the formula $2h(L + B) + (L + B)$. To this 10% should be added as an allowance for inter bag space.

F. SEPARATE STORAGE FOR DIFFERENT COMMODITIES:

Each commodity should be stored crop year wise in separate stacks with distinct identity.

G. BRUSHING OF BAGS BEFORE SPRAYING / FUMIGATION:

Before stocks are dusted or sprayed, bags should be brushed as this helps to remove the collected dust, webs, cocoons, eggs etc. that might be sticking to the bags. After fumigation the bags should also be brushed thoroughly to remove dead pest and residue of fumigant.

H. FORTNIGHTLY INSPECTION:

Godowns and stocks should be thoroughly inspected at least once a fortnight: during rains the inspection should be frequent. Inspection should consist of:-

Check up godown walls, roof and floor.

Check up peripheral, top and bottom layer bags in case of bag storage.

Check up of representative sample of each stack.

Check up of stocks of different depths/sides in case of bulk storage.

I. DURING INSPECTION IT SHOULD BE ASCERTAINED WHEREAS:-

- 1) Proper standard of godown hygienic and cleanliness is being maintained.
- 2) There are any leakage/cracks and godown stand in need of any repairs.
- 3) There is any likely hood of damage to stocks due to godown leakage.

- 4) The floor is free from seepage or not, if not, whether the stocks are likely to get damaged due to seepage.
- 5) There is any heating etc in the stocks.
- 6) The stocks require turn over owing to heating.
- 7) There is any cake formation along walls in case of bulk storage.
- 8) The grain of bottom layer bags and other bags is dry, if not whether there is any likely hood of damage to stocks on account of excessive moisture.
- 9) The stocks are free from infestation. If not, what is the kind and magnitude of infestation and whether spraying/fumigation of the stocks is warranted?
- 10) There is any damage to stocks due to infestation and, if yes, to what extent.
- 11) There are any stocks warranting immediate disposal for reasons of deterioration.
- 12) The fumigation has been done in time.
- 13) The stocks have been dusted on due dates.
- 14) There is any rat trouble in the godowns.
- 15) There is any damage to stocks caused by rats.

The observations made during inspection should be recorded in the stack wise inspection register and stack cards. Whatever action is required on above points as a result of inspection should be taken at once. A detailed report about the action taken and required to be taken should be sent to H.O/RM Office.

J. FUMIGATION:

In case of infestation, the stocks should be fumigated with Aluminum Phosphide under gas proof covers as per following norms:-

Dosage-3 tablets or 9 grams per MT of stocks Exposure period: 1 week

Dosage	Remarks
Fumigation under Gas Proof cover 3 tablet or 9 Grams per MT of stocks	Immediately when the infestation of pests is noticed and pre- monsoon fumigation before the onset of monsoon.

After fumigation is carried out, it should be noticed if there are any crawling insects on the top of stacks or on sides, if fumigated, under gas proof cover it should be presumed that the fumigation operation has not been successful. The cause should be looked into and avoided for future operation: & stocks should be fumigated again and after exposures period after fumigation the bags and the stacks should be cleaned and brushed thoroughly to remove ash and dead pest & stocks should be sprayed with Deltamethrin or with Malathion (in case of crawling infestation) to eliminate the chances of any living pest.

The PMS service provider will also require purchasing all insecticides required for maintenance of health of stocks during a particular calendar year well in advance. He will also have to deposit the purchase bill of insecticides so purchased with the OSWC.

The PMS service provider will also have to maintain the record of the insecticides consumed from time to time and also the empty container/tubes, which will be disposed of with the prior approval of the OSWC and also in the presence of the Authorized Representative of the OSWC.

K. TREATMENT FOR RAIN AFFECTED STOCKS:

In case of receipt of rain affected stocks of wheat/rice, the service provider shall take necessary salvaging operations and aerate the stocks before stacking to maintain the health of such stocks during storage.
